

Ken Taylor

Full-Stack Systems Engineer & AI Specialist | Georgetown, Guyana
hello@kentaylor.dev | <https://github.com/ktappdev> | <https://kentaylor.dev>

Technical Profile

Systems-focused Software Engineer and Entrepreneur with a deep specialization in **Go, Rust, and modern full-stack frameworks (Next.js and SvelteKit)**, and AI/LLM systems. Knowledgeable in the full software lifecycle: from architecting high-performance backends and **local AI orchestration** to managing production deployments on private VPS infrastructure. Extensive background in **professional audio production** and broadcast technology integration.

Technical Stack & Infrastructure

Category	Technologies
Languages	Go (High-Performance APIs), Rust, TypeScript, JavaScript, SQL
Web Architecture	Next.js (App Router), Astro, Skelte, Tailwind CSS, PWA, REST
Data & DevOps	Redis (Caching/Queues), PostgreSQL, Linux SysAdmin, VPS Management, Docker, Tailscale, Github, Node
AI & Hardware	Local LLM Serving & Optimization (vLLM, llama.cpp, IPEX-LLM), GPU Acceleration, and Multi-Agent AI Systems

Category	Technologies
Media Engineering	Professional Audio Production, Radio Automation (Myriad), Signal Processing, Remote audio

Core Engineering Projects

Proprietary AI Orchestration Engine

- Architected an in-house multi-agent development system featuring specialized **Orchestrator, Scout, Builder, and Reviewer** roles.
- Optimized local inference for Gemma and Qwen models using hardware acceleration on Intel Arc B580 media engines.

Full-Stack Live Production: www.reviewlt.gy

- Built and deployed a localized business review platform using a **Go-Next.js-Redis** stack on a private VPS. All microservices hosted on my own VPS
- Managed end-to-end infrastructure including server hardening, SEO optimization, and database management.

Professional Audio Producer & Engineer

Lead Audio Engineer and Music Producer at **Brutal Tracks Recording Studio**, producing commercially successful music, advertisements, and multimedia content.

Professional Development

- **Self-taught software engineer** with advanced independent study in distributed systems, systems programming, and LLM architectures.
- **Production Portfolio:** Validated expertise through a decade of shipped software and live production systems serving the Guyanese market.
