WORK HISTORY

LugeTech - Co-Founder

Georgetown, Guyana (Remote) • 02/2021 - Current

CORE ENGINEERING PROJECTS

- Proprietary AI Orchestration Engine
- Architected an in-house multi-agent development system featuring specialized Orchestrator, Scout, Builder, and Reviewer roles.
- Optimized local inference for Gemma and Qwen models using hardware acceleration on Intel Arc B580 media engines., Full-Stack Live Production: www.reviewit.gy
- Built and deployed a localized business review platform using a Go-Next.js-Redis stack on a private VPS. All microservices hosted on my own VPS
- Managed end-to-end infrastructure including server hardening, SEO optimization, and database management.

PROFESSIONAL AUDIO PRODUCER & ENGINEER

Lead Audio Engineer and Music Producer at Brutal Tracks Recording Studio, producing commercially successful music, advertisements, and multimedia content.

PROFESSIONAL DEVELOPMENT

- Self-taught software engineer with advanced independent study in distributed systems, systems programming, and LLM

architectures.

- Production Portfolio: Validated expertise through a decade of shipped software and live production systems serving the Guyanese market.
